Arguments and Inference - Philosophy Pages

The only thing that cannot happen is for a deductive argument to have true premises and a valid inference but a false conclusion. Some logicians designate the combination of true premises and a valid inference as a sound argument; it is a piece of reasoning whose conclusion must be true.

What is difference between inference and argument? - Quora

An Inference is a necessary element without which an argument cannot exist. Using the frame of difference in relation to the two is a bit misleading. They are not antonyms. Inferences are quite different from assumptions, which are not based on evidence and often involve past experience or

What is an Argument? Understanding Premises, Inferences ...

Inferences are the reasoning parts of an argument. Conclusions are a type of inference, but always the final inference. Usually, an argument will be complicated enough to require inferences linking the premises with the final conclusion.
