Biofuel - Wikipedia

A biofuel is a fuel that is produced through contemporary biological processes, such as agriculture and anaerobic digestion, rather than a fuel produced by geological processes such as those involved in the formation of fossil fuels, such as coal and petroleum, from prehistoric biological matter.

Biofuel News - Alternative Energy News

The latest alternative fuel news from our biodiesel, biofuel, and ethanol fuel news sources.

Biofuels - Alternative Energy

Biofuels. Biofuels are produced from living organisms or from metabolic by-products (organic or food waste products). In order to be considered a biofuel the fuel must contain over 80 percent renewable materials.
