## Botnet - Wikipedia

A botnet is a number of Internet-connected devices, each of which is running one or more bots. Botnets can be used to perform distributed denial-of-service attack (DDoS attack), steal data, send spam, and allows the attacker to access the device and its connection.

## Understanding Hidden Threats: Rootkits and Botnets

What are rootkits and botnets? A rootkit is a piece of software that can be installed and hidden on your computer without your knowledge. It may be included in a larger software package or installed by an attacker who has been able to take advantage of a vulnerability on your computer or has convinced you to download it (see Avoiding Social What Is a Botnet? - How-To Geek

Botnets Explained: If your computer is part of a botnet, it's infected with a type of malware. The bot contacts a remote server or just gets into contact with other nearby bots and waits for instructions from whoever is controlling the botnet.

## Botnet - Wikipedia, la enciclopedia libre

Las Botnets normalmente usan servicios gratuitos de DNS para IP's dinamicas como DynDns.org, No-IP.com, & Afraid.org para apuntar a un subdominio al cual el creador puede conectarse en caso que le cierren el servidor de IRC. The Rise of IoT Botnets - American Security Project Neena Kapur is a 2017 WiSe Cohort Member. The issue of internet of things (IoT) botnets is a security issue that has already surfaced in 2016, and will likely only grow in severity as different actors in the cyber realm leverage the technology for their own purposes.

## Botnet - Wikipedia

Een voorbeeld van hoe een botnet wordt gebruikt voor het maken en sturen van spam: Een botnetbeheerder stuurt een computervirus of computerworm het internet op, die andere computers infecteren met een bot.

## Botnet | Define Botnet at Dictionary.com

Botnet definition, a network of computers created by malware and controlled remotely, without the knowledge of the users of those computers: The botnet was used primarily to send spam emails. Hackers built the botnet to carry out DDoS attacks. See more.

## Common threats to be aware of - Get Cyber Safe

Botnets. If you've never heard of a botnet, it's likely because they go largely undetected. What they are: A collection of software robots, or 'bots', that creates an army of infected computers (known as zombies) that are remotely controlled by the originator.
