[Wiring the Shop for 220V ~ Half-Inch Shy](#)

The main service panel is the breaker box on your house; the subpanel is just a smaller version that will be located in the shop. The subpanel is rated for 100A meaning the current paths in the box are capable of handling 100A continuous-duty. I only need 60A brought into the shop so the feed from the main panel will have a 60A breaker.
