 Chemical kinetics and reaction mechanisms (101 pages) was raised to a higher level. To this chapter the author also added, among other things, a description of the laser technique for observing the motion of atoms and molecules during chemical changes. Ahmed Zewail was awarded the Nobel Prize for Chemistry in 1999 for developing this novel laser technique that allowed femto-second kinetic

This Perspective presents a personal overview of the current status of the theory of chemical kinetics and mechanisms for complex processes. We attempt to assess the status of the field for reactions in the gas phase, at gas solid interfaces, in liquid solutions, in enzymes, and for protein folding.
