[Classification, Disease and Evidence: New Essays in the ...](#)

The book is divided into three sections: classification, disease and evidence. In general, attention is focused on statistics in medicine and epidemiology, issues in psychiatry and connecting medicine with evolutionary biology and genetics. Many authors position the theories that they address within their historical contexts.

Human disease - Classifications of diseases | Britannica.com

Human disease - Classifications of diseases:

Classifications of diseases become extremely important in the compilation of statistics on causes of illness (morbidity) and causes of death (mortality). It is obviously important to know what kinds of illness and disease are prevalent in an area and how these prevalence rates vary with time.
