Based on fuzzy set theory, the fuzzy linguistic terms in decision-making process could be well expressed during the quantitative analysis. Multiple attribute decision-making (MADM) can help identify ecological security performance involving multiple conflicting attributes by aggregating the performance indicators with their weights. Fuzzy multiple attribute decision making: A review and new ...

This paper reviews the main theories and methods used for multiple attribute decision making in a fuzzy environment. Fuzzy multiple attribute decisions involve two processes, the rating and the ranking of alternatives.

Multiple Attribute Decision Making: Methods and Applications

A compilation of modern decision-making techniques, Multiple Attribute Decision Making: Methods and Applications focuses on the fuzzy set approach to multiple attribute decision making (MADM). Drawing on their experience, the authors bring together current methods and real-life applications of MADM techniques for decision analysis.
