In the current era of health care reform, the pressures to truly manage patient care and to build effective integrated delivery systems are generating intense interest in patient care information systems. Health care institutions cannot provide seamless access to care without seamless access to

...

The user in this paper is not a medical specialist but a real user of healthcare, a patient. The paper starts by looking at the lack of impact of information systems (ISs) in healthcare, examining

Nursing Information Systems - PubMed Central (PMC)

Patients, nurses, midwives and health visitors can all benefit from the lessons learned during the early development of nursing information systems and from the strategic approach now being taken. The realization of these benefits will be dependent on continued collaboration between health care professionals, the Department of Health and the IT suppliers.
