[For loop in Java with example - BeginnersBook.com](#)
Loops are used to execute a set of statements repeatedly until a particular condition is satisfied. In Java we have three types of basic loops: for, while and do-while.

[Java for Practitioners | SpringerLink](#)

Java for Practitioners doesn't just provide an introduction to Java, it also tells you all about object orientation. One of the biggest problems with many of the Java books currently on the market is that they only teach the language and ignore the object orientation aspects (or at best just devote one chapter to it).
