Multi-Agent Based Simulation (MABS) is used in various research and application domains such as social science, ecology, ethology, etc. Considering this interdisciplinary aspect, one crucial issue is that many MABS end-users are not professional programmers while most MABS toolkits

require computer programming skills [1]. Many MABS toolkits tackle this issue by defining coding primitives that

Tutorial on Agent-based Modeling and Simulation

Agent-based Simulation Is a New Field Grounded in the Biological, Social, and Other Sciences What is an agent? A discrete entity with its own goals and behaviors. Autonomous, with a capability to adapt and modify its behaviors. Assumptions Some key aspect of behaviors can be described. Mechanisms by which agents interact can be described. Complex social processes and a system.
