Algorithms and Preconditioning in PDE-Constrained Optimization

PDE-constrained optimization problem Minimize $F(y;u)$ objective s.t. $e(y;u) = 0$ PDE constraint and $g(y;u) \leq 0$ inequalities Two sets of optimization variables u control/design variables y statevariables coupled through the PDE $e(y;u) = 0$ In this talk F, e, g are assumed sufficiently smooth.

Optical tomography as a PDE-constrained optimization problem

Optical tomography as a PDE-constrained optimization problem 1509 might be added to (3). We refer interested readers to references [33, 54, 58, 59] for detailed discussions on that. There are several techniques to solve the problem (3)[49]. All existing algorithms in the optical tomography community convert (3) into an unconstrained optimization problem.
