## [Predation - Wikipedia](#)

Predation is a biological interaction where one organism, the predator, kills and eats another organism, its prey. It is one of a family of common feeding behaviours that includes parasitism and micropredation (which usually do not kill the host) and parasitoidism (which always does, eventually).

## [Predation | Definition of Predation by Merriam-Webster](#)

1: the killing by one living organism of another for food. These small fish are most vulnerable to predation just after sunset, when larger fish, such as barracuda and jacks, chase them into the shallow water near shore to feed on them.

## [Predation | Define Predation at Dictionary.com](#)

WGA is classified as a lectin a term for a protein produced by an organism to protect itself from predation.

## [Predation | animal behaviour | Britannica.com](#)

Predation, in animal behaviour, the pursuit, capture, and killing of animals for food. Predatory animals may be solitary hunters, like the leopard, or they may be group hunters, like wolves.
