[a94\\_nijmannekariis\\_cropraidding\\_applanimbhsc\\_2010.pdf](#)

Crop-raiding by primates is increasingly known to cause conflict between humans and primates, and due to their opportunism, adaptability, intelligence and manipulative abilities, primates can be significant agricultural pests. Levels of crop-raiding are dependent on time of year, crop type, size and location of the farm, and primate species involved, making it difficult for farmers to predict. (PDF) Landscape requirements of a primate population in a ...

As urban and rural land development become widespread features of the global landscape so an understanding of the landscape requirements of displaced and isolated wildlife species becomes
