Stochastic coalgebraic logic works in a general probabilistic setting, in contrast to some more traditionally oriented approaches that use finite or countably infinite state spaces.

In this survey we discuss the generalisation of stochastic Kripke models for general modal logics through predicate liftings for functors over general measurable spaces. We derive results on expressivity and show that selection arguments allow us to incorporate the discussion of bisimilarity, provided the underlying spaces are assumed to be standard Borel.

[WorldCat.org]

Coalgebraic logic is an important research topic in the areas of concurrency theory, semantics, transition systems and modal logics. It provides a general approach to modeling systems, allowing us to apply important results from coalgebras, universal algebra and category theory in novel ways.

Combining coalgebraic reasoning, stochastic systems and logic, this volume presents the principles of coalgebraic logic from a categorical perspective. Modal logics are also discussed, including probabilistic interpretations and an analysis of Kripke models.

Stochastic coalgebraic logic: Bisimilarity and behavioral ...

Bisimulations, behavioral equivalence and logical equivalence are investigated for stochastic T-coalgebras that interpret coalgebraic logic which is defined in terms of predicate liftings.

Stochastic Coalgebraic Logic - Preamble

Stochastic relations form the mathematical basis for a probabilistic interpretation of coalgebraic logics. They provide also a foundation for Markov transition systems. These relations in turn are based on transition probabilities, and because we do not confine ourselves to the probabilistic case but rather accept models in which mass vanishes, we base the theory on transition sub

Coalgebraic Logic | Springer for Research & Development

Abstract. Investigating equivalent behavior of stochastic Kripke models for modal logics or their close cousins such as the tree logics used for model checking follows usually this pattern: the state space is partitioned into states that satisfy exactly the same formulas.
