[What is the psychiatric significance of bilateral basal ...](#)

One percent (143) of patients who underwent cranial computed tomography at the Central Institute of Mental Health during the last 10 years had bilateral basal ganglia mineralization (BGM).

[TBI Staff Training: SELF-STUDY: Module 9 - Mobility](#)

Injury to the nervous system produces many motor symptoms, ranging from paralysis of one or a few muscles to generalised difficulties in planning and co-ordinating complex movements. To understand the connection between the brain injury and the motor impairments that you see it is useful to understand a little about the anatomy of the skull and the brain.

[TBI Staff Training: SELF-STUDY: Module 11 - Mental health ...](#)

Lying underneath the cerebral cortices are the basal ganglia and these basal ganglia are a series of nuclei and nerve fibres that interconnect all areas of the brain. It is a very dense and compact area of the brain and if you have damage in this region, as can occur, particularly in high velocity injury, you often will have a very small area of damage but it has really widespread.

[A De Novo Mutation in the -Tubulin Gene TUBB4A](#)

Results in ...

Hypomyelination with atrophy of the basal ganglia and cerebellum (H-ABC) is a rare hereditary leukoencephalopathy that was originally identified by MRI pattern analysis, and it has thus far defied all attempts at identifying the causal mutation.
