Red Pulp - an overview | ScienceDirect Topics

The ratio of red pulp to white pulp in human spleen is higher than that in mouse because white pulp accounts for a greater proportion of the splenic volume in mouse. The red pulp is the primary site of filtering in both species (Figures 13 E and 14 A), with a meshwork of sinusoids and cords serving as a filter.

Spleen - Wikipedia

The spleen contains two different tissues, white pulp (A) and red pulp (B). The white pulp functions in producing and growing immune and blood cells. The red pulp functions in filtering blood of antigens, microorganisms, and defective or worn-out red blood cells.

Cardiovascular System - Spleen Development - Embryology

mouse, rat and human - spleen consists of the white pulp embedded in the red pulp. white pulp - T and B lymphocytes form accumulations, the periarteriolar lymphatic sheaths and the follicles, located around intermediate-sized arterial vessels, the central arteries. red pulp - reticular connective tissue containing all types of blood cells.
