Theoretical and Actual Yields - Chemistry LibreTexts

Chemical reaction equations give the ideal stoichiometric relationship among reactants and products. Thus, the theoretical yield can be calculated from reaction

stoichiometry. For many chemical reactions, the actual yield is usually less than the theoretical yield, understandably due to loss in the process or inefficiency of the chemical reaction.

How to Calculate Theoretical Yield: 12 Steps (with Pictures)

The theoretical yield is a term used in chemistry to describe the maximum amount of product that you expect a chemical reaction could create. You need to begin with a balanced chemical equation and define the limiting reactant. When you measure the amount of that reactant that you will be using, you
